

Intensive Care Nephrology: beyond BASIC

Jointly developed by the BASIC collaboration and the European Society of Intensive Care Medicine

3rd to 4th August 2023
Oxford University Blavatnik
School of Government

£175
**(including catering and
course materials)**

- Consolidate your critical care nephrology through a combination of workshops, skills stations and lectures
- Hands on experience prescribing and troubleshooting continuous and intermittent renal replacement modalities
- Covers acute kidney injury, applied tubular physiology, principles of drug dosing, and management of transplant and CKD patients in critical care
- Includes course textbook, online materials, pre- and post-course exams with feedback
- Tailored towards senior intensive care trainees and as a refresher for consultants – but ALL welcome
