

National Deceased Donation Course for ICM Trainees

Suitable for trainees in either paediatric or adult intensive care medicine.

Priority given to ST5+

**DEVELOPED WITH FICM AND ICS ENGAGEMENT
COVERING FICM SYLLABUS DOMAIN 8 END OF LIFE CARE.**

“One of the best courses I have attended, high quality is mainly driven by the enthusiasm and great knowledge of the faculty members and the presence of national experts and leads in the subject of organ donation.”

Lectures & simulation training to gain knowledge and skills in:

- Organ donation principles and practice
- Safely diagnosing death
- End of life & family donation discussions
- Withdrawal of life sustaining treatment in DCD
- The capacity to make informed ethical and legal choices in the context of organ donation and wider ICM practice.
- The ability to work productively with others, particularly Specialist Nurses

- Free 2 day national course
- Includes accommodation & meals
- Experienced & expert faculty
- Consistently evaluated as excellent
